Eigennet

Software Engineer · 2024 – Present

Only engineer trusted with clearance to architect and operate a classified AWS document pipeline — **500+ deliveries per month** at **99.7% success**, zero supervision.

Built an AI extraction engine on SageMaker processing **10K+ pages daily** at **99% accuracy**, cutting manual review by **85%**. Python automation eliminated **20+ hours/week** of manual packaging, encryption, and SFTP delivery.

Custom EC2/S3 batch orchestration with real-time monitoring reduced transmission failures by **90%**. Validation layer catches schema drift and anomalies — zero downstream incidents.

Freddie Mac

Software Engineering Intern · 2023

Built a Java validation engine the Financial Engineering team still runs — schema drift and anomaly detection across millions of rows, **60% less** reconciliation effort.

Automated alerts that **tripled** bug-catch rate before production. Compressed a 2-week quarterly process to **3 days** through full automation.

Embark embark-theta.vercel.app

React + TypeScript + FastAPI + Python + Supabase

Full RPG engine for real life — quests, XP, loot drops with rarity tiers, and a progression system that keeps **50+ users** coming back. Real-time Supabase subscriptions and FastAPI WebSockets for live progress tracking.

Cinetik cinetik.app

React + TypeScript + FastAPI + Python

Movie and TV tracker with TMDB integration, TanStack Query, Zustand state management — PostgreSQL backend handling **500K+ records**. Responsive Tailwind UI deployed to production.

TypeScript · JavaScript · Python · React · Next.js · FastAPI · Django · Tailwind · Zustand · TanStack Query · PostgreSQL · Supabase · AWS · Docker · Terraform · SageMaker · GraphQL · REST APIs · Git · CI/CD · Vercel · Linux · Pandas · OpenAI · Figma · Jest

George Mason University — M.S. Computer Science, 2024 – Present

James Madison University — B.S. Computer Science, 2020 – 2024
