SKILLS

Frontend

React TypeScript Next.js Vite
Tailwind Zustand TanStack

Backend

Python FastAPI Django
PostgreSQL Supabase GraphQL

Cloud

AWS Docker Terraform Vercel
CI/CD

Tools

Git Postman Figma Jest
Linux

EDUCATION

George Mason University

M.S. Computer Science
2024 – Present

James Madison University

B.S. Computer Science
2020 – 2024

Experience

Eigennet

Software Engineer

2024 – Present

- Only engineer with clearance trusted to architect a classified AWS pipeline — **500+ deliveries/month**, **99.7% success**, zero supervision
- Built an AI extraction engine on SageMaker — **10K+ pages daily** at **99% accuracy**, cutting manual review by **85%**
- Python automation that killed **20+ hours/week** of manual work — packaging, encryption, SFTP delivery, end-to-end
- Custom EC2/S3 orchestration with real-time monitoring — transmission failures down **90%**
- Validation layer catching schema drift and anomalies before data ships — zero downstream incidents

Freddie Mac

Software Engineering Intern

2023

- Java validation engine the Financial Engineering team still uses — catches drift across millions of CSV rows, **60% less** reconciliation
- Automated alerts that **tripled** the bug-catch rate before production
- Compressed a 2-week quarterly process to **3 days** — automated what nobody thought possible

Projects

Embark

embark-theta.vercel.app

React TypeScript FastAPI Python Supabase

- Full RPG engine for real life — quests, XP, loot drops, rarity tiers, **50+ users** actively playing
- Real-time Supabase subscriptions + FastAPI WebSockets — live progress, no refresh

Cinetik

cinetik.app

React TypeScript FastAPI Python

- Movie/TV tracker with TMDB, TanStack Query, Zustand — PostgreSQL handling **500K+ records**
- Responsive Tailwind UI deployed to production
