

Dylan Ballard

FULL-STACK SOFTWARE ENGINEER

dylanballard55@gmail.com | 703-848-5998 | Reston, VA | github.com/dballard10 | linkedin.com/in/dballard55

Experience

Eigennet

2024 – Present

Software Engineer

- Sole cleared developer managing a secure AWS document transmission pipeline, delivering **500+ classified documents monthly** with a **99.7%** success rate
- Engineered an AI extraction engine on SageMaker processing **10K+ pages daily** at **99% accuracy**, reducing manual review effort by **85%**
- Automated metadata packaging, encryption, and SFTP delivery in Python, eliminating **20+ hours/week** of manual work
- Built EC2/S3 batch workflows with real-time API-driven monitoring, reducing transmission failures by **90%**
- Developed validation pipelines for schema drift and anomaly detection, preventing downstream data incidents

Freddie Mac

2023

Software Engineering Intern

- Developed a Java data-validation tool detecting anomalies and schema drift across financial CSV datasets, cutting reconciliation effort by **60%**
- Integrated automated version-mismatch alerts, catching **3x more** integrity issues before production
- Compressed quarterly reconciliation from **2 weeks to 3 days** through automated CSV comparison workflows

Projects

Embark

embark-theta.vercel.app

React TypeScript FastAPI Python Supabase

- Life gamification app with RPG quest engine — users earn XP, collect rarity-tiered items, and level up through real-world challenges
- Real-time Supabase + FastAPI backend serving **50+ active users** with WebSocket progress tracking

Cinetik

cinetik.app

React TypeScript FastAPI Python

- Full-stack media tracking app with TMDb integration, TanStack Query, and Zustand state management
- PostgreSQL backend handling **500K+ records** with responsive Tailwind UI
