SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Java, HTML, CSS

Frameworks: React, Next.js, React Native, FastAPI, Django, Tailwind CSS, Vite, Zustand, TanStack Query

Data & AI: Pandas, NumPy, SageMaker, OpenAI, Anthropic, Celery, asyncio

Cloud: AWS (EC2, S3, RDS, Lambda, SageMaker), Docker, Terraform, GitHub Actions, Vercel, Railway

Databases: PostgreSQL, MySQL, Supabase, REST APIs, GraphQL

Tools: Git, Node.js, Postman, Figma, Jira, Jest, Pytest, Vitest, Linux

EXPERIENCE

Eigennet

2024 – Present

Software Engineer

- Architected secure AWS-based document transmission pipeline handling **500+ classified documents monthly** as sole cleared developer, achieving **99.7% delivery success rate**
- Built high-speed LLM extraction service on SageMaker processing **10K+ pages/day** with **99% field-level accuracy**, reducing manual review time by **85%**
- Automated end-to-end metadata packaging, zip creation, and SFTP delivery using Python, eliminating **20+ hours/week** of manual processing
- Engineered EC2/S3 batch workflows with internal API tracking, cutting transmission errors by **90%** and enabling real-time delivery monitoring
- Developed scalable Python/Django validation pipelines that catch schema drift and data anomalies before transmission, preventing downstream failures

Freddie Mac

2023

Software Engineering Intern

- Designed and shipped a Java-based data-validation tool that detects anomalies and schema drift across large financial CSV datasets, reducing manual reconciliation by **60%**
- Integrated automated version-mismatch alerts into the Financial Engineering team's pipeline, catching **3x more** data-integrity issues before production
- Compressed quarterly reconciliation process from **2 weeks to 3 days** by automating previously manual CSV comparison workflows

PROJECTS

Embark React, TypeScript, FastAPI, Python, Supabase

embark-theta.vercel.app

- Built a life-gamification web app with RPG quest engine, XP/currency systems, and rarity-tiered item collection serving **50+ active users**
- Implemented real-time progress tracking with Supabase subscriptions and FastAPI WebSocket endpoints

Cinetik React, TypeScript, FastAPI, Python

cinetik.app

- Shipped a full-stack media tracking app with TMDB integration via TanStack Query, Zustand state management, and responsive Tailwind UI
- Deployed scalable PostgreSQL data layer with optimized queries handling **500K+ movie/show records**

EDUCATION

George Mason University

M.S. Computer Science, 2024 – Present

James Madison University

B.S. Computer Science, 2020 – 2024
